**INSPECTION CHECKLIST**

- Attached structures such as decks, carports, porch covers, etc., must be self supporting.
- If deck or stair surfaces are over 30" above grade then a 36" railing with 4" maximum baluster spacing is required.
- Code compliant hand rails are required on stairs having 4 or more rises (steps).
- A 6 mil black vapor barrier shall cover the entire ground area under the manufactured home.
- 1 sq ft of skirting ventilation per every 150 sq ft of floor area is required.
- All skirting around the manufactured home shall be constructed of an approved material (metal, vinyl, pressure treated wood, etc.)
- Provide at least one 16" x 24" crawl space access.
- Tie downs and blocking are required and shall have been installed to the specifications of the year in which the manufactured home was initially set up.
- Vent pressure relief valve from hot water tank to the exterior. Do not drain into crawl space area. Vent must terminate between 6" and 18" above the ground and be directed toward the ground.
- Vent dryer to exterior. Do not vent to crawl space area. Vent must be made of smooth metal. Do not connect the pipe together with screws as this may trap link and cause fire.
- Minimum 4" house numbers required on a contrasting back ground.
